DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I in the paper filed October 30, 2003 is acknowledged.

Claims 1, 2, 4-15, 17, 18, 20 and 21 and SEQ ID NO:5 and 12 (within claims 22-27) are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the paper filed October 30, 2003.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 6-9, 12-16 and 22- 27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/080,794. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 is fully encompassed in claims 1-3, 6-9, 22, 23 and 27 of the instant Application. Further, the compositions as claimed by claims 12-16 and 24-26 are fully disclosed in the copending application, and necessarily required for the methods claimed in 10/080,794 and, therefore, are obvious compositions in view of the disclosure of 10/080,794.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless—

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6, 7, 8, 22, 23 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Sensibar et al. (cancer Research, 55, 2431-2437, 1995, cited on PTO 1449).

Sensibar et al. discloses phosphorothioate antisense oligonucleotides fully complementary to a nucleic acid encoding Sulfated glycoprotein-2 (an alternative name for TRPM-2), including the translation initiation codon. Sensibar et al. do not disclose

Art Unit: 1635

that their oligonucleotides delay progression of prostatic tumor cells to an androgen-independent state or enhancing chemo- or radiation sensitivity of cancer cells, however, the antisense compositions of Sensibar et al. meet all of the limitations of the compositions claimed in claims 1, 2, 6, 7, 8, 22, 23 and 27 and, therefore, would be expected to inherently have these properties.

Therefore, Sensibar et al. anticipates claims 1, 2, 6, 7, 8, 22, 23 and 27.
